Translational Research Scholarship Programme 2020: Expression of Interest

Frequently Asked Questions

Updated on 27.01.2020

Contents

Who can apply?	2
Translational Research Project Eligibility	4
Supervision	5
Funding	7
Expression of Interest Deadline	8
Progression to Full Application.....	8
Start of Research Scholarship Programme.....	9

Who can apply?

1. Can a student with only a 2.2 honours degree apply for a Scholarship?

No, you must have obtained (or expect to obtain) a first or upper second class honours bachelor degree to apply for a scholarship.

2. I received a 2.2 in my undergraduate degree but received a distinction- or merit-level master's degree, am I eligible to apply?

Yes, you can apply if you have a distinction- or merit-level master's degree.

3. Are the scholarships available to students studying abroad?

No, the research must take place at a host institution in the Republic of Ireland.

4. Are non-Irish citizens living in the Republic of Ireland eligible to apply?

Yes, if you are a non-Irish citizen but are eligible to study in Ireland, and you meet the eligibility criteria, you can apply for a Scholarship. It is the applicant's responsibility to ensure they are eligible to study in Ireland.

5. Are Scholarships tenable for individuals studying in Northern Ireland?

Scholarships are tenable only for researchers who will conduct their research in the Republic of Ireland. This is because the money raised for the Irish Cancer Society to fund cancer research is raised in the Republic of Ireland.

6. Can I apply for funding if I have already begun my PhD?

No, you can only apply for a scholarship if you have not yet commenced your PhD.

7. Is there an upper age limit to the application?

No, there is no upper age limit.

8. I completed my undergraduate degree a number of years ago, am I still eligible?

You will only be eligible if you have been working in a field relevant to your proposed PhD study i.e., maintenance of skills and knowledge gained during your undergraduate studies.

To discuss eligibility in such cases, please contact grants@irishcancer.ie.

9. Can medical doctors apply for the PhD Scholarship?

Yes, medical doctors may apply for the scholarships. However, the proposed project must be in the area of translational biomedical science.

10. I wish to complete my PhD in 3 years, can I apply?

No, the Scholarship must be 48months in duration.

Translational Research Project Eligibility

1. What does translational biomedical research mean?

Translational research can be defined as “bench to bedside” or patient-focused research, the aim of translational research is to translate existing knowledge about cancer biology into techniques and tools that will accelerate progress towards patient benefit.

2. What type of projects are eligible?

If you are unsure of your project eligibility, please contact grants@irishcancer.ie before 3pm Monday 10 February.

The following are examples of the types of projects that will be considered, please note that the examples are for demonstrative purposes. The list of examples given is not an exhaustive list but will provide guidance on some project options.

Please note: Basic discovery or knowledge gathering research projects (T₀) will not be accepted. The project must be translational (T_{0.5}– T₁).

The following are eligible project examples:

- *As preliminary work, the researchers identified a new drug which prevents growth in lung cancer cells (T₀ basic research discovery). As part of the scholarship, the researchers will now complete further studies to test if the drug will progress positively towards early-stage cancer trials (T_{0.5} to T₁).*
- *As preliminary work, a protein has been identified as a potential candidate for targeted therapy (T₀ basic research discovery). As part of the scholarship application, the translational research project (T_{0.5} to T₁) will evaluate potential compounds or combinations of compounds that will potentially have therapeutic efficacy. The compound will be tested using an established experimental system.*
- *Biomarker projects to stratify patients for treatments, i.e. advancing personalised treatment.*
- *A translational research project associated with a clinical trial. Payment to the host institute will only be released on receipt of all necessary institutional ethical approvals. However, a small provision of allocated monies may be made available at the start of the award to facilitate the ethical approval process where necessary.*

- *Preclinical studies to determine the optimal combination and sequencing of standard-of-care drugs prior to the commencement of a clinical trial.*
- *Preclinical or early phase trials to aid in guiding treatment regime/assess response to therapy e.g. test markers, imaging or assays.*

3. I am unsure if my project is eligible?

If you have any concerns please contact grants@irishcancer.ie. Please note, the deadline for checking project eligibility or any additional FAQ queries is Monday 10 February at 3pm.

Supervision

1. Can a supervisor sponsor more than one student for separate projects who are both applying for a Scholarship?

Yes, a supervisor can sponsor more than one scholarship applicant.

2. Can a supervisor sponsor a project more than once but with different applicants who are both applying for a Scholarship?

No, a project cannot be submitted more than once. Applications with the same project from different applicants will be automatically discounted.

3. Is it necessary to have two supervisors?

Yes, two supervisors must be identified when completing your application through the Irish Cancer Society [Gateway Grant Tracker](#) online system.

4. What is the purpose of having two supervisors?

It is often good practice for there to be two supervisors for every student, as it provides back up for those situations where one supervisor is ill, leaves, or issues arise with the

supervisor-student relationship. In addition it can provide breadth and support to the project. It is important that all supervisors are aware that they have a responsibility for the student and there is no scope for nominal supervision.

The role of each supervisor will vary according to the research project. In many cases one supervisor will play a major role in directing the research and the role of the second supervisor will be more supportive. However, both supervisors have a responsibility for the student's progress and will be expected to take an active role in the supervision process.

One supervisor may have a minimum of 1 year's post-doctoral experience. In having this criteria we are encouraging more junior members of research teams to be actively involved in the research project and to be recognised as a supervisor.

5. Can there be more than two supervisors?

You can include additional supervisors but they must have a documented and active role in the research as collaborators. Such proposed relationships should be described in the application.

6. Do supervisors need to be permanent members of staff?

The most experienced supervisor must hold a post at the proposed host research institute that covers the duration of the scholarship.

Ideally the second supervisor should also hold a contract for the duration of the PhD. However, given this person is only required to have 1 year postdoctoral experience, we will consider any co-supervisor who can demonstrate their commitment to the supervision of the student throughout the whole study period.

It is the responsibility of the applicant to ensure that their supervisors also meet the host institution's requirements for a research supervisor.

7. Why do I need to submit CVs for my two proposed supervisors as part of the application process?

The research track record of the supervisors, relative to their career stage, will be assessed as part of the overall research scholarship application.

Funding

1. Is there an overall limit for the amount of funding granted?

The total value of the Irish Cancer Society Research Scholarship covering stipend, fees, materials and dissemination will be up to €36,000 per year for a maximum of four years.

A mandatory provision of €1,000 is available to support Public and Patient Involvement (PPI) in the proposed research project.*

Additionally, mobility funding of up to a maximum of €7,000 for travel to a national or (preferably) international research institution in furtherance of advancement of the research project aims, over the course of the programme (must be used in the first 3 years of the scholarship), must be included in the application. If the mobility funding has not been utilised by the end of year 2, a revised mobility plan will be automatically requested as part of the 2nd Year Annual Report. The purpose of this mobility element is to allow the applicant an opportunity to spend time working in varied research environments to maximise project impact and to aid the individual in their career development prospects.

A further fund will also be available in Year 3 & 4 of the scholarship to contribute towards dissemination of research in a high impact journal. This funding is separate to the travel and dissemination budget which must be detailed in the budget section of the application. The successful scholar will need to apply for this dissemination funding support at least three months in advance of the planned publication. Each application (scholar mobility element and dissemination awards respectively) will be reviewed before a funding decision is made. Further details of the dissemination fund will be provided at the full application stage.

Please note that full details of budget guidelines will be provided at the full application stage of this funding award.

** Please note that the €1,000 available for PPI may be supplemented with funds from the annual €36,000 budget. However, the annual €36,000 budget may **not** be supplemented with the PPI fund.*

2. How many Irish Cancer Society Research Scholarships are available?

There is one scholarship available in 2020: One for Translational Biomedical Research.

3. Does the grant cover host institute overheads?

As a charity, the Irish Cancer Society is not in a position to pay for host institution overheads for its research funding.

Expression of Interest Deadline

1. When do expression of interest applications need to be in by?

*Applications must be submitted online through [Gateway Grant Tracker](#) by **3pm Tuesday 20 February 2020**.*

2. Do the signatories have to approve the application by this deadline?

Yes. All signatories (your two proposed supervisors) have to approve the application by this deadline. They can do this through their online portal.

It is the responsibility of the applicant to ensure that their application is approved by all signatories before the deadline. Please ensure that the application is submitted with sufficient time allowed for the signatory to approve.

Progression to Full Application

1. When will applicants find out if they have been shortlisted to submit a full application?

Applicants will find out if they have been shortlisted to submit a Full Application in March 2020.

2. What will the full application entail?

The full application will look for more specific and in-depth research project details such as project background, hypothesis, objectives, methodology, ethical considerations, and plans plus a revised, detailed Patient involvement plan, sharing of research findings, mobility element, research environment, and budget.

Shortlisted applicants will be provided guidance documents on how to complete the full application.

3. Will I need to attend an interview?

If your full application is shortlisted, you will be expected to attend an interview in Dublin 4/5 June 2020 (date to be confirmed).

Start of Research Scholarship Programme

1. When do successful Research Scholars commence?

Successful Research Scholars will begin in September 2020.
